Fieldday · artwork V1

Review 46d5ec13-d2ee-454d-a834-5879d1af73ca | 2026-10-16T14:16:25.016Z

Market: Fictional company checklist | Engine: Gemini proposals + exact comparisons

Scope: comparison against supplied sources. This report does not certify legal compliance or authorize printing.

Results

issue: 1 | review: 11 | unable: 6 | match: 9

Coverage: Only supplied sources and supported comparisons were evaluated.

Coverage: Typography, panel placement, print production, barcode scan quality and complete regulatory coverage are not certified.

Coverage: Native text can omit outlined or raster text. Confirm coverage before asserting absence.

MATCH | Brand and product identity

Expected: Fieldday; Oat Drink

Observed: Fieldday; Oat Drink

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - fieldday-v1.pdf Page 1: Fieldday

Evidence - fieldday-v1.pdf Page 1: Oat Drink

MATCH | Variant

Expected: Original

Observed: Original

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Section 2: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Section 2: The front panel must display the approved variant Original.

Evidence - fieldday-v1.pdf Page 1: Original

ISSUE | Net quantity

Expected: 1000 mL

Observed: 750 mL

The extracted artwork differs from the supplied reference.

Rule: Every displayed net quantity must equal the approved specification value. Convert L and mL before comparing.

Evidence - company-rulebook.json Section 3: Every displayed net quantity must equal the approved specification value. Convert L and mL before comparing.

Evidence - product-spec.json product.net_quantity: {"value":1000,"unit":"mL","preferred_display":"1 L","equivalent_display":"1000 mL"}

Evidence - fieldday-v1.pdf Page 1: 750 mL

MATCH | Ingredients

Expected: Water, oats (12%), sunflower oil, sea salt.

Observed: Water, oats (12%), sunflower oil, sea salt.

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - company-rulebook.json Section 4: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - product-spec.json product.ingredients: Water, oats (12%), sunflower oil, sea salt.

Evidence - fieldday-v1.pdf Page 1: Water, oats (12%), sunflower oil, sea salt.

MATCH | Allergen wording

Expected: Contains oats.

Observed: Contains oats.

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - company-rulebook.json Section 5: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - product-spec.json product.allergen_statement: Contains oats.

Evidence - fieldday-v1.pdf Page 1: Contains oats.

MATCH | Energy and basis

Expected: 196 kJ; 47 kcal

Observed: 196 kJ; 47 kcal

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - company-rulebook.json Section 6: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - product-spec.json nutrition.energy_kj: 196

Evidence - product-spec.json nutrition.energy_kcal: 47

Evidence - fieldday-v1.pdf Page 1: 196 kJ

Evidence - fieldday-v1.pdf Page 1: 47 kcal

MATCH | Fat and basis

Expected: 1.5 g

Observed: Fat 1.5 g

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 7: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - product-spec.json nutrition.fat_g: 1.5

Evidence - fieldday-v1.pdf Page 1: Fat 1.5 g

MATCH | Protein and basis

Expected: 1.1 g

Observed: Protein 1.1 g

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 8: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - product-spec.json nutrition.protein_g: 1.1

Evidence - fieldday-v1.pdf Page 1: Protein 1.1 g

MATCH | Manufacturer and contact

Expected: Northstar Foods (Fictional); hello@fieldday.example

Observed: Northstar Foods (Fictional); hello@fieldday.example

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The artwork must include the approved manufacturer name and customer-care email.

Evidence - company-rulebook.json Section 9: The artwork must include the approved manufacturer name and customer-care email.

Evidence - product-spec.json product.manufacturer: Northstar Foods (Fictional)

Evidence - product-spec.json product.customer_care: hello@fieldday.example

Evidence - fieldday-v1.pdf Page 1: Northstar Foods (Fictional)

Evidence - fieldday-v1.pdf Page 1: hello@fieldday.example

MATCH | Recycling qualifier

Expected: Carton recyclable where facilities exist.

Observed: Carton recyclable where facilities exist.

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - company-rulebook.json Section 10: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - product-spec.json product.recycling_copy: Carton recyclable where facilities exist.

Evidence - fieldday-v1.pdf Page 1: Carton recyclable where facilities exist.

UNABLE | After-opening storage

Expected: Refrigerate after opening.

Observed: Not detected in extracted content

The required copy was not detected in extracted content. Absence is unconfirmed because extraction coverage has not been verified. This result covers content; panel placement is tracked separately.

Rule: Include the approved after-opening storage statement on the retail package.

Evidence - company-rulebook.json Section 11: Include the approved after-opening storage statement on the retail package.

Evidence - product-spec.json product.storage_statement: Refrigerate after opening.

REVIEW | Claim approval evidence

Expected: Approval evidence for recognized claims

Observed: No Added Sugar

The supplied evidence does not establish approval for these claims. This is not a conclusion that a claim is false or illegal.

Rule: Each promotional claim must have applicable approval evidence in the supplied claims register. An absent entry or insufficient evidence requires human review and does not establish that the claim is false or illegal.

Evidence - company-rulebook.json Section 12: Each promotional claim must have applicable approval evidence in the supplied claims register. An absent entry or insufficient evidence requires human review and does not establish that the claim is false or illegal.

Evidence - fieldday-v1.pdf Page 1: No Added Sugar

Evidence - claims-register.json Line 9: Smooth & creamy

UNABLE | Brand and product identity

Expected: The front panel must display Fieldday and Oat Drink.

Observed: Rule needs interpretation

This rule was retained but could not be compiled into a supported comparison. Connect AI or supply a structured rulebook.

Rule: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Line 16: The front panel must display Fieldday and Oat Drink.

REVIEW | Variant

Expected: Original

Observed: Original

The extracted artwork matches this supplied reference. The AI interpretation of this rule requires reviewer confirmation.

Rule: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Line 30: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Line 30: The front panel must display the approved variant Original.

Evidence - fieldday-v1.pdf Page 1: Original

REVIEW | Net quantity

Expected: 1000 mL

Observed: 750 mL

The extracted artwork differs from the supplied reference. The AI interpretation of this rule requires reviewer confirmation.

Rule: Every displayed net quantity must equal the approved specification value. Convert L and mL before comparing.

Evidence - company-rulebook.json Line 41: Every displayed net quantity must equal the approved specification value. Convert L and mL before comparing.

Evidence - product-spec.json product.net_quantity: {"value":1000,"unit":"mL","preferred_display":"1 L","equivalent_display":"1000 mL"}

Evidence - fieldday-v1.pdf Page 1: 750 mL

REVIEW | Ingredients

Expected: Water, oats (12%), sunflower oil, sea salt.

Observed: Water, oats (12%), sunflower oil, sea salt.

The extracted artwork matches this supplied reference. The AI interpretation of this rule requires reviewer confirmation.

Rule: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - company-rulebook.json Line 52: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - product-spec.json product.ingredients: Water, oats (12%), sunflower oil, sea salt.

Evidence - fieldday-v1.pdf Page 1: Water, oats (12%), sunflower oil, sea salt.

REVIEW | Allergen wording

Expected: Contains oats.

Observed: Contains oats.

The extracted artwork matches this supplied reference. The AI interpretation of this rule requires reviewer confirmation.

Rule: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - company-rulebook.json Line 63: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - product-spec.json product.allergen_statement: Contains oats.

Evidence - fieldday-v1.pdf Page 1: Contains oats.

UNABLE | Energy and basis

Expected: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Observed: Rule needs interpretation

This rule was retained but could not be compiled into a supported comparison. Connect AI or supply a structured rulebook.

Rule: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - company-rulebook.json Line 74: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

UNABLE | Fat and basis

Expected: The fat value and its per-100-mL basis must match the approved nutrition specification.

Observed: Rule needs interpretation

This rule was retained but could not be compiled into a supported comparison. Connect AI or supply a structured rulebook.

Rule: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Line 85: The fat value and its per-100-mL basis must match the approved nutrition specification.

UNABLE | Protein and basis

Expected: The protein value and its per-100-mL basis must match the approved nutrition specification.

Observed: Rule needs interpretation

This rule was retained but could not be compiled into a supported comparison. Connect AI or supply a structured rulebook.

Rule: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Line 96: The protein value and its per-100-mL basis must match the approved nutrition specification.

UNABLE | Manufacturer and contact

Expected: The artwork must include the approved manufacturer name and customer-care email.

Observed: Rule needs interpretation

This rule was retained but could not be compiled into a supported comparison. Connect AI or supply a structured rulebook.

Rule: The artwork must include the approved manufacturer name and customer-care email.

Evidence - company-rulebook.json Line 107: The artwork must include the approved manufacturer name and customer-care email.

REVIEW | Recycling qualifier

Expected: Carton recyclable where facilities exist.

Observed: Carton recyclable where facilities exist.

The extracted artwork matches this supplied reference. The AI interpretation of this rule requires reviewer confirmation.

Rule: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - company-rulebook.json Line 118: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - product-spec.json product.recycling_copy: Carton recyclable where facilities exist.

Evidence - fieldday-v1.pdf Page 1: Carton recyclable where facilities exist.

REVIEW | After-opening storage

Expected: Refrigerate after opening.

Observed: Not detected in extracted content

The required copy was not detected in extracted content. The AI interpretation of this rule requires reviewer confirmation.

Rule: Include the approved after-opening storage statement on the retail package.

Evidence - company-rulebook.json Line 129: Include the approved after-opening storage statement on the retail package.

Evidence - product-spec.json product.storage_statement: Refrigerate after opening.

REVIEW | Claim approval evidence

Expected: Approval evidence for recognized claims

Observed: No Added Sugar

The supplied evidence does not establish approval for these claims. This is not a conclusion that a claim is false or illegal. AI transcription or the proposed rule interpretation requires confirmation.

Rule: Each promotional claim must have applicable approval evidence in the supplied claims register. An absent entry or insufficient evidence requires human review and does not establish that the claim is false or illegal.

Evidence - company-rulebook.json Line 140: Each promotional claim must have applicable approval evidence in the supplied claims register. An absent entry or insufficient evidence requires human review and does not establish that the claim is false or illegal.

Evidence - fieldday-v1.pdf Page 1: No Added Sugar

Evidence - claims-register.json Line 9: Smooth & creamy

REVIEW | Verify panel placement

Expected: Brand and product identity: front; Variant: front; Ingredients: back; Allergen wording: back; Energy and basis: back; Fat and basis: back; Protein and basis: back; Manufacturer and contact: back; Recycling qualifier: back; After-opening storage: back

Observed: Locations have not been automatically verified

Content matches do not establish that copy appears on the required panel. Inspect the artwork against the checklist and record the result in Sources.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 2: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Section 4: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - company-rulebook.json Section 5: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - company-rulebook.json Section 6: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - company-rulebook.json Section 7: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 8: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 9: The artwork must include the approved manufacturer name and customer-care email.

Evidence - company-rulebook.json Section 10: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - company-rulebook.json Section 11: Include the approved after-opening storage statement on the retail package.

REVIEW | Claim substantiation status for No Added Sugar

Expected: Human review of AI observation

Observed: No Added Sugar

The front panel carries the claim 'No Added Sugar', but claims register FD-CLAIM-020 only lists 'Smooth & creamy'. Additionally, the nutrition panel reports 3.5 g sugars per 100 mL alongside 12% oats. Review is needed to check whether sugar naturally derives from oat processing and whether this unlisted claim satisfies brand requirements, noting that register absence triggers review rather than automatic illegality.

Rule: AI observation; not a verified rule violation.

Evidence - fieldday-v1.pdf Page 1: No Added Sugar

REVIEW | Promotional copy registration status

Expected: Human review of AI observation

Observed: Made for a slower morning.

The back panel features the copy 'Made for a slower morning.', which does not appear in claims register FD-CLAIM-020. Under rule R12 and register instructions, marketing statements absent from the register require human review to evaluate scope without presuming rejection.

Rule: AI observation; not a verified rule violation.

Evidence - fieldday-v1.pdf Page 1: Made for a slower morning.
