Market: United States | Engine: Local extraction + exact comparisons

Scope: comparison against supplied sources. This report does not certify legal compliance or authorize printing.

Review note: DancingFish_Granola_BerryCrunch_US_Content_Sheet.xlsx: Spreadsheet formulas use their saved values; formulas, macros, and external links are not executed.

Coverage: Only supplied sources and supported comparisons were evaluated.

Coverage: Physical-size, allergen-cue, nutrition-math and reviewer-drawn panel-zone checks are screening aids; they are not a regulatory or print-production certification.

Coverage: Native text can omit outlined or raster text. Confirm coverage before asserting absence.

Coverage: Image transcription is a corroboration aid only. A vision/OCR miss requires a person to inspect the rendered crop and does not prove text is absent.

REVIEW | Source approval needs confirmation

Expected: An approved reference for this review

Observed: Draft or unconfirmed source supplied

The source is suitable for comparison, but an observed difference is not proof that the artwork is wrong. Confirm source authority before release.

REVIEW | Nutrition sanity · calories vs macronutrients

Expected: Calories within 20% of the 4-4-9 screening estimate

Observed: Declared 250 kcal; 4-4-9 estimate 4250.0 kcal (94% difference)

The supplied nutrition values differ materially from the 4-4-9 screening estimate. This can result from a source error, basis mismatch, rounding or nutrients outside this simple screen; confirm the approved nutrition calculation.

Rule: Internal nutrition plausibility screen; it compares source values with each other before artwork comparison.
