Fieldday · artwork V1

Review 307db720-c1fe-4b55-b51e-81546f5448db | 2026-10-16T22:45:49.230Z

Market: Fictional company checklist | Engine: Local extraction + exact comparisons

Scope: comparison against supplied sources. This report does not certify legal compliance or authorize printing.

Results

issue: 2 | review: 5 | unable: 3 | match: 20

Coverage: Only supplied sources and supported comparisons were evaluated.

Coverage: Physical-size, allergen-cue, nutrition-math and reviewer-drawn panel-zone checks are screening aids; they are not a regulatory or print-production certification.

Coverage: Native text can omit outlined or raster text. Confirm coverage before asserting absence.

Coverage: Image transcription is a corroboration aid only. A vision/OCR miss requires a person to inspect the rendered crop and does not prove text is absent.

MATCH | Brand and product identity

Expected: Fieldday; Oat Drink

Observed: Fieldday; Oat Drink

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - fieldday-v1.pdf Page 1: Fieldday

Evidence - fieldday-v1.pdf Page 1: Oat Drink

MATCH | Variant

Expected: Original

Observed: Original

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Section 2: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Section 2: The front panel must display the approved variant Original.

Evidence - fieldday-v1.pdf Page 1: Original

ISSUE | Net quantity

Expected: 1000 mL

Observed: 750 mL

The extracted artwork differs from the supplied reference.

Rule: Every displayed net quantity must equal the approved specification value. Convert L and mL before comparing.

Evidence - company-rulebook.json Section 3: Every displayed net quantity must equal the approved specification value. Convert L and mL before comparing.

Evidence - product-spec.json product.net_quantity: {"value":1000,"unit":"mL","preferred_display":"1 L","equivalent_display":"1000 mL"}

Evidence - fieldday-v1.pdf Page 1 · line 7: 750 mL

MATCH | Ingredients

Expected: Water, oats (12%), sunflower oil, sea salt.

Observed: Water, oats (12%), sunflower oil, sea salt.

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - company-rulebook.json Section 4: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - product-spec.json product.ingredients: Water, oats (12%), sunflower oil, sea salt.

Evidence - fieldday-v1.pdf Page 1: Water, oats (12%), sunflower oil, sea salt.

MATCH | Allergen wording

Expected: Contains oats.

Observed: Contains oats.

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - company-rulebook.json Section 5: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - product-spec.json product.allergen_statement: Contains oats.

Evidence - fieldday-v1.pdf Page 1: Contains oats.

MATCH | Energy and basis

Expected: 196 kJ; 47 kcal

Observed: 196 kJ; 47 kcal

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - company-rulebook.json Section 6: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - product-spec.json nutrition.energy_kj: 196

Evidence - product-spec.json nutrition.energy_kcal: 47

Evidence - fieldday-v1.pdf Page 1: 196 kJ

Evidence - fieldday-v1.pdf Page 1: 47 kcal

MATCH | Fat and basis

Expected: 1.5 g

Observed: Fat 1.5 g

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 7: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - product-spec.json nutrition.fat_g: 1.5

Evidence - fieldday-v1.pdf Page 1: Fat 1.5 g

MATCH | Protein and basis

Expected: 1.1 g

Observed: Protein 1.1 g

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 8: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - product-spec.json nutrition.protein_g: 1.1

Evidence - fieldday-v1.pdf Page 1: Protein 1.1 g

MATCH | Manufacturer and contact

Expected: Northstar Foods (Fictional); hello@fieldday.example

Observed: Northstar Foods (Fictional); hello@fieldday.example

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: The artwork must include the approved manufacturer name and customer-care email.

Evidence - company-rulebook.json Section 9: The artwork must include the approved manufacturer name and customer-care email.

Evidence - product-spec.json product.manufacturer: Northstar Foods (Fictional)

Evidence - product-spec.json product.customer_care: hello@fieldday.example

Evidence - fieldday-v1.pdf Page 1: Northstar Foods (Fictional)

Evidence - fieldday-v1.pdf Page 1: hello@fieldday.example

MATCH | Recycling qualifier

Expected: Carton recyclable where facilities exist.

Observed: Carton recyclable where facilities exist.

The extracted artwork matches this supplied reference. This result covers content; panel placement is tracked separately.

Rule: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - company-rulebook.json Section 10: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - product-spec.json product.recycling_copy: Carton recyclable where facilities exist.

Evidence - fieldday-v1.pdf Page 1: Carton recyclable where facilities exist.

UNABLE | After-opening storage

Expected: Refrigerate after opening.

Observed: Not detected in extracted content

The required copy was not detected in extracted content. Absence is unconfirmed because extraction coverage has not been verified. This result covers content; panel placement is tracked separately.

Rule: Include the approved after-opening storage statement on the retail package.

Evidence - company-rulebook.json Section 11: Include the approved after-opening storage statement on the retail package.

Evidence - product-spec.json product.storage_statement: Refrigerate after opening.

REVIEW | Claim approval evidence

Expected: Approval evidence for recognized claims

Observed: No Added Sugar

The supplied evidence does not establish approval for these claims. This is not a conclusion that a claim is false or illegal.

Rule: Each promotional claim must have applicable approval evidence in the supplied claims register. An absent entry or insufficient evidence requires human review and does not establish that the claim is false or illegal.

Evidence - company-rulebook.json Section 12: Each promotional claim must have applicable approval evidence in the supplied claims register. An absent entry or insufficient evidence requires human review and does not establish that the claim is false or illegal.

Evidence - fieldday-v1.pdf Page 1: No Added Sugar

Evidence - claims-register.json Line 9: Smooth & creamy

MATCH | Panel zone · Brand and product identity

Expected: front zone on page 1

Observed: Located evidence is inside the reviewer-defined front zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The front panel must display Fieldday and Oat Drink.

Evidence - company-rulebook.json Section 1: The front panel must display Fieldday and Oat Drink.

Evidence - fieldday-v1.pdf Page 1: Fieldday

ISSUE | Panel zone · Variant

Expected: front zone on page 1

Observed: Located evidence is outside the reviewer-defined front zone or on page 1.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The front panel must display the approved variant Original.

Evidence - company-rulebook.json Section 2: The front panel must display the approved variant Original.

Evidence - fieldday-v1.pdf Page 1: Original

MATCH | Panel zone · Ingredients

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - company-rulebook.json Section 4: The ingredient declaration must match the approved specification, including order and percentages.

Evidence - fieldday-v1.pdf Page 1: Water, oats (12%), sunflower oil, sea salt.

MATCH | Panel zone · Allergen wording

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - company-rulebook.json Section 5: The artwork must carry the supplied allergen wording from the approved specification.

Evidence - fieldday-v1.pdf Page 1: Contains oats.

MATCH | Panel zone · Energy and basis

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - company-rulebook.json Section 6: The nutrition panel must show the approved kJ and kcal energy values on the approved per-100-mL basis.

Evidence - fieldday-v1.pdf Page 1: 196 kJ

MATCH | Panel zone · Fat and basis

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 7: The fat value and its per-100-mL basis must match the approved nutrition specification.

Evidence - fieldday-v1.pdf Page 1: Fat 1.5 g

MATCH | Panel zone · Protein and basis

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - company-rulebook.json Section 8: The protein value and its per-100-mL basis must match the approved nutrition specification.

Evidence - fieldday-v1.pdf Page 1: Protein 1.1 g

MATCH | Panel zone · Manufacturer and contact

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: The artwork must include the approved manufacturer name and customer-care email.

Evidence - company-rulebook.json Section 9: The artwork must include the approved manufacturer name and customer-care email.

Evidence - fieldday-v1.pdf Page 1: Northstar Foods (Fictional)

MATCH | Panel zone · Recycling qualifier

Expected: back zone on page 1

Observed: Located evidence is inside the reviewer-defined back zone.

This geometric result uses the reviewer-drawn artwork zone. It does not determine the legally applicable principal display panel or replace visual approval.

Rule: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - company-rulebook.json Section 10: Retain the full supplied recycling phrase, including where facilities exist.

Evidence - fieldday-v1.pdf Page 1: Carton recyclable where facilities exist.

UNABLE | Panel zone · After-opening storage

Expected: back zone on page 1

Observed: No located artwork evidence for this check

A reviewer-defined panel zone is available, but this check has no reliable text region to compare against it. Inspect the artwork manually.

Rule: Include the approved after-opening storage statement on the retail package.

Evidence - company-rulebook.json Section 11: Include the approved after-opening storage statement on the retail package.

REVIEW | Legibility screening · Net quantity

Expected: Reviewer-set screening threshold: 1.6 mm

Observed: Approx. 13.4 mm (38.0 pt) from extracted PDF coordinates; above the screening threshold

The extracted text height is above the selected screening value. A reviewer must confirm actual glyph height, artwork scale and applicable requirement.

Rule: Approximate PDF bounding-box height screen. This is not an applicable legal minimum or print approval.

Evidence - fieldday-v1.pdf Page 1 · line 7: 750 mL

REVIEW | Legibility screening · Allergen wording

Expected: Reviewer-set screening threshold: 1.6 mm

Observed: Approx. 4.4 mm (12.6 pt) from extracted PDF coordinates; above the screening threshold

The extracted text height is above the selected screening value. A reviewer must confirm actual glyph height, artwork scale and applicable requirement.

Rule: Approximate PDF bounding-box height screen. This is not an applicable legal minimum or print approval.

Evidence - fieldday-v1.pdf Page 1: Contains oats.

REVIEW | Legibility screening · Ingredients

Expected: Reviewer-set screening threshold: 1.6 mm

Observed: Approx. 5.6 mm (15.9 pt) from extracted PDF coordinates; above the screening threshold

The extracted text height is above the selected screening value. A reviewer must confirm actual glyph height, artwork scale and applicable requirement.

Rule: Approximate PDF bounding-box height screen. This is not an applicable legal minimum or print approval.

Evidence - fieldday-v1.pdf Page 1: Water, oats (12%), sunflower oil, sea salt.

REVIEW | Allergen visual-emphasis cue

Expected: An explicit CONTAINS cue or uppercase allergen cue for visual inspection

Observed: No explicit uppercase or CONTAINS cue detected in extracted text.

This checks visible text cues only. Font weight, contrast, language requirements and applicable allergen-formatting rules require visual and regulatory review.

Rule: Visual cue screening; it does not establish allergen-format compliance.

Evidence - product-spec.json product.allergen_statement: Contains oats.

Evidence - fieldday-v1.pdf Page 1: Contains oats.

MATCH | Nutrition sanity · calories vs macronutrients

Expected: Calories within 20% of the 4-4-9 screening estimate

Observed: Declared 47 kcal; 4-4-9 estimate 45.9 kcal (2% difference)

The supplied nutrition values pass this internal plausibility screen. Rounding, fibre, polyols and jurisdiction-specific calculation rules still need review.

Rule: Internal nutrition plausibility screen; it compares source values with each other before artwork comparison.

Evidence - product-spec.json nutrition.basis: {"value":100,"unit":"mL"}

Evidence - product-spec.json nutrition.energy_kj: 196

Evidence - product-spec.json nutrition.energy_kcal: 47

Evidence - product-spec.json nutrition.fat_g: 1.5

Evidence - product-spec.json nutrition.saturates_g: 0.2

Evidence - product-spec.json nutrition.carbohydrate_g: 7

Evidence - product-spec.json nutrition.sugars_g: 3.5

Evidence - product-spec.json nutrition.fibre_g: 0.7

Evidence - product-spec.json nutrition.protein_g: 1.1

Evidence - product-spec.json nutrition.salt_g: 0.1

MATCH | Nutrition sanity · Sugars ≤ Total carbohydrate

Expected: Sugars must not exceed Total carbohydrate in the supplied values

Observed: Sugars: 3.5 g; Total carbohydrate: 7 g

The supplied values satisfy this internal component relationship.

Rule: Internal nutrition component relationship; it does not establish regulatory compliance.

Evidence - product-spec.json nutrition.basis: {"value":100,"unit":"mL"}

Evidence - product-spec.json nutrition.energy_kj: 196

Evidence - product-spec.json nutrition.energy_kcal: 47

Evidence - product-spec.json nutrition.fat_g: 1.5

Evidence - product-spec.json nutrition.fibre_g: 0.7

Evidence - product-spec.json nutrition.protein_g: 1.1

Evidence - product-spec.json nutrition.salt_g: 0.1

UNABLE | Barcode or QR presence not verified

Expected: A scan result or visual reviewer confirmation when a code is relevant.

Observed: No locally decoded symbol.

A lack of decoder output is not proof that the artwork has no barcode or QR code. The symbol may be unreadable, vector-only, truncated, or not required.

Rule: Code scanning is optional and does not determine retail requirements.
